

## FCamController™

### Ciurix - FCamController

Voltage	12-24V DC (Min 9.0V Max 36V)
Power	12W Maximum
Operating Temperature	+5°C to +60°C
Working Humidity	<90%
LAN/Ethernet	RJ45
Power Input	2.1mm DC jack
Power Indicator	LED
Status Screen	LCD
<b>Dimensions &amp; Weight</b>	
Length	250mm
Width	250mm
Height	60mm
Weight	5.1Kg

### About FCamController

The FCamController monitors the status of the FCam™ network and communicates alarm events and camera status to the outside world. It also allows remote reset of camera alarms. Normally used with one or more FCam I/O Modules to provide remote inputs and volt-free outputs from the FCam network. *Please note: only one controller is required per FCam™ network.*
