ENFORCERV10

One panel to suit them all

The easiest installation choice you'll have to make

All the best features of the Enforcer 32WE and Enforcer HomeControl+ panels brought together with the Enforcer V10. Instead of options being black or white, now you can provide any functionality or application with one panel. Superior security, Wi-Fi as standard, compatible with all communications and much more. The Enforcer V10 is changing the game.

**Phone sold separately

Keeping you ahead of the curve with DIGI-WIFI included as standard

PSTN and traditional phone lines continue to develop issues since the move to digital, while IP communications and push notifications with smart apps go from strength to strength. So, a DIGI-WIFI module* is supplied for free, as standard with the Enforcer V10, to deliver PyronixCloud and HomeControl+ connectivity and all the benefits they provide.*

Safe on the go control & monitoring with the HomeControl+ App & PyronixCloud

- **Complete control from anywhere in the world**
  Set and unset the system, get system status and receive custom push notifications from any event.

- **HD monitoring**
  Add IP cameras to the system for live stream monitoring of the property.

- **Android & Apple compatible**
  The HomeControl+ App is available in two versions: on Android™ from the Google Play Store and on iOS™ from the Apple App store.

- **Highly secure connection**
  The HomeControl+ App and PyronixCloud communications are encrypted to the highest standard.

- **No on-site IT configuration**
  The Enforcer V10 is connected through a cloud server, so there is no need to set up static IP addresses or configure the network connection on site; instead you simply set up an account on PyronixCloud.com.

- **Recurring revenue & retention**
  Streams of recurring revenue can be established by offering PyronixCloud management services; managing this or passing access to users. This increases customer retention and makes the system more profitable.

Connect as required with the complete compatibility with all communication options

Whatever the communication need, the Enforcer V10 gives you the option. Simply purchase the option you want and fit it into the panel.
Get to know one & master them all, with fully menu-driven programming

Easily navigate through the menus of the Enforcer V10 with the same uniform menu-driven programming. Simple 'YES/NO' questions allow fast and efficient installing to save both time and money.

All other communication options, including PSTN (DIGI-1200) are sold separately.
