# Delivering new technologies in partnership

**AI Analytics**  
Uses powerful algorithms to automate detection, categorisation, and analysis of objects and motion in a camera's view

**Low-lighting Imaging**  
See colorful and clear footage in dim light with Hikvision ColorVu and DarkFighterX technologies

**Ultra HD**  
Solve limited resolution and stuttered video problems with our 4K and smooth streaming technologies

**Thermal Imaging**  
Make the invisible thermal radiation "visible" in the form of heat zone images with thermal imaging technologies

**Multi-lens Synergy**  
Cameras with TandemVu Technology maintain original, big-picture views even during panning, tilting, and zooming manoeuvres

**Storage & Bandwidth**  
Keep your security system up and running smoothly and cost-effectively with H.265+ compression, direct streaming, smooth streaming, and scheduled backup technologies

**Intrusion Verification as a Service**  
Verifying alarms with real-time video when an event happens

**Ease of Installation**  
Save time and money on unnecessary cable installation by using only one cable

## Celebrating our ongoing partnership with DVS.

At Hikvision we are proud to partner with DVS on their 20th anniversary, who bring to market security products and solutions every day.

Our R&D workforce at Hikvision manufacture a full suite of comprehensive products and solutions for a broad range of vertical markets. In addition to the security industry, Hikvision extends its reach to smart home tech, industrial

automation, and automotive electronics industries to achieve its long-term vision. Hikvision products also provide powerful business intelligence for end users, which can enable more efficient operations and greater commercial success.

The outstanding capabilities and performance of Hikvision in the video security industry have been recognised by leading analyst firms and global awards.

## PRODUCT PORTFOLIO

### Software licence codes

(adjustable: Cloud Storage 1 day – 1 year): no limits on cameras per account / number of users. Easy scalability and connection of old systems & new locations to cloud service

### Ivideon Bridge

A device to connect any camera brand to Ivideon VSaaS and transform traditional video surveillance system into the cloud

### Ivideon business analytics & business intelligence modules

Face Recognition

Heat Maps

ANPR

People Counter

Queue Detection

Ivideon Control Center

## IVIDEON BRIDGE

**Transfer entire business ecosystem, large or small, from on-site storage to the cloud using Ivideon Bridge**

- Up to 16 cameras per one device
- Compatible with 98% of cameras and NVRs (ONVIF or RTSP protocol needed)
- 10-minute setup, no special skills or knowledge required
- Advanced cloud features without significant capital investments
- Hybrid storage by connecting up to 1TB hard drive and/or up to 128GB microSD card

[global@ivideon.com](mailto:global@ivideon.com)  
[ivideon.com](http://ivideon.com)

ivideon

ivideon

**Ivideon is the world's leading provider** of cloud surveillance systems for video streaming and cloud recording on the market, and whose software is used by many of the biggest brands in the industry, including Hikvision.

Ivideon makes it fast and easy to hook up an unlimited number of locations with an unlimited number of cameras, no matter where they are, and collect them

all in the Ivideon account. You can also watch online and archived videos from anywhere in the world using any modern platform, as long as you're connected to the Internet.

CCTV

# SAFETY, SECURITY AND RELIABILITY ALL WRAPPED UP

## Dedicated Surveillance Drives Built to deliver, designed to last

- Designed and tested for compatibility
- Industry-leading performance
- Integrated RV sensors
- High endurance, high reliability

All drives are  
supported by DVS:

# TOSHIBA

**dvs**<sup>TM</sup>  
www.dvs.co.uk

# TOSHIBA

**Fully supporting the requirements of today's surveillance storage market**, Toshiba's expansive surveillance HDD line-up targets the increasing demand of small & medium businesses, professional & public and big data & analytics. Optimised for network video recorders (NVR), digital video recorders (DVR) or centralised backend storage.

Toshiba offers purpose built surveillance storage solutions targeting the different requirements of application areas in today's growing surveillance market. They provide stable 24/7 operation and are optimised for the needs of leading surveillance DVRs and NVRs.

When analyzing security footage, you can't risk any frame drops. That's why your storage has to provide ultimate performance to detect rapid movements, record the smallest details, and perform face recognition. The S300 Pro has been designed to meet your specialist demands and is built for 24/7 reliability and high-performance to help you never miss a thing.

CCTV

**CCTV TOWERS AVAILABLE IN ANY BRITISH STANDARD RAL COLOUR**

Proven Leader in - Access Control, Time & Attendance And Biometric Solutions.

Suprema is a leading global provider of access control, time & attendance and biometrics solutions. By combining world renowned biometric algorithms with superior engineering, Suprema has introduced innovations to the security industry over the last decades.

Suprema's extensive range of portfolio includes biometric access control systems, time & attendance solutions, fingerprint live scanners, mobile authentication solutions and embedded fingerprint modules.

Access Control

# S-KEY

Simple. Safe. Secure.

Eliminate the security risk of **lost, borrowed** or **stolen** access cards

#### S-KEY BENEFITS

- Fingerprint activated
- Works with NFC/13.56 MHz readers
- No additional infrastructure costs
- Sustainable batteryless solution
- Hygienic contactless technology
- Personal data never leaves the card

## Secure, fingerprint activated biometric access control cards

As easy as 1,2,3...

1

Hold your finger on the sensor

2

Tap your card on the reader

3

Access is granted

Works on NFC/13.56 MHz readers with no additional infrastructure costs

**Freevolt Technologies is a UK technology company developing next-generation biometric smart card products for the access control and healthcare sectors.**

Spun out from work completed at Imperial College London, and developed over 7 years, Freevolt is a global award-winning suite of proprietary, patented and patent-pending technologies that recycle and harvest RF energy from radio transmission networks (NFC, cellular, Wi-Fi, etc.) to power next-generation biometric smart cards. The Company owns over 20 granted patents protecting our IP across multiple territories.

Our lead product, S-Key, is a battery-less biometric smart card for access control, helping businesses reduce security and impersonation risks through stronger user authentication. It is now available for the access control market we continue to explore and develop the S-Key platform across other vertical markets, helping bridge the gap between physical and digital access solutions.

**HDANYWHERE (HDA) aspires to deliver 80% of everyday smart home functionality for 80% less total cost, by providing unique and innovative products that neaten technology and simplify the user and installation experience.**

The HDA product line covers video and audio distribution and control processors that are purpose-built on stable technology platforms and create the “digital plumbing” for a modern AV-centric smart

home experience. HDANYWHERE hardware has all the features necessary to help integrators meet a wide range of project requirements.

Choosing HDANYWHERE gives integrators more options to win more projects by delivering better value-for-budget or reducing the cost of entry into smart home living.

Audio Visual

- DETECT MULTIPLE FIRES IN SECONDS
- BOTH INDOORS & OUTDOORS
- ALL LIGHT LEVELS - DAY & NIGHT
- SEE FIRE AT UP TO 180 METRES

# FIRE DETECTION HAS EVOLVED

**CORECONTROL**

**CORE Control Hub** - The central point for the CORE system which provides power, control and interface functions for CORE devices. Supports up to 6 CORE devices directly, and up to 128 with the use of Extension Hubs.

Meets the requirements of BS5839-1 (UK fire standard). Designed specifically for use with fire-rated "FP" data cable and provides over 24 hours backup supply in power failure.

**CORE Extension Hubs** - Each adds capacity for an additional 4 or 8 CORE devices to the system. Linked to the Control Hub via FP data cable, fibre-optic, or wirelessly.

**CORE I/O Module** - Allows additional granularity of alarm reporting to other systems. Provides straightforward linking to fire systems, fixed suppression, water cannons, remote monitoring, and many other systems.

**SOLOFP**

**ENVIRONMENT** indoor

**DETECTION RANGE** up to 100 metres

**OPTIONS** semi-concealed, custom finish

**POPULAR APPLICATIONS** large atria, transport & logistics, trading floors, distribution centres, manufacturing, social housing

**XFP**

**ENVIRONMENT** moisture / dust / outdoors

**DETECTION RANGE** 180m indoor / 80m outdoor

**OPTIONS** air clean, extra low temperature

**POPULAR APPLICATIONS** airside & airport terminals, waste & recycling, construction, distribution, frozen storage, power generation

**XCRFP**

**ENVIRONMENT** high corrosion risk (316L)

**DETECTION RANGE** 180m indoor / 80m outdoor

**OPTIONS** extra low temperature

**POPULAR APPLICATIONS** waste & recycling, dockside, marine, coastal sites, chemical handling areas, manufacturing

**EXFP**

**ENVIRONMENT** explosive areas (ATEX)

**DETECTION RANGE** 180m indoor / 80m outdoor

**OPTIONS** custom length approved cabling

**POPULAR APPLICATIONS** waste & recycling, chemical plants, oil & gas, palm oil refineries, chemical storage, power generation

At Ciqurix we have been designing, developing and manufacturing innovative, revolutionary video fire detection since 2012.

We are a UK company with a global distribution network, enabling fire detection in industries and environments where traditional systems are inadequate.

Our CORE system brings fire detection to areas that were previously unprotectable, providing versatility, reliability and accuracy. Instead of waiting for

combustion particles or heat to reach a detector, our video fire detection uses multiple sensors and complex analytic technology to see and recognise a fire starting within seconds. It is designed for compliance to BS5839-1, uses fire-rated cabling, and will continue to operate from its internal battery supply for over 24 hours during power failure.

Detection

- Rapidly deployable to sites with no power
- 5MP camera with adjustable resolution
- 4G secure connection to cloud server
- Self-monitor or integrate with CMS platforms
- 15m or 40m detection patterns
- Battery or solar-powered options
- Two-way audio, Live Streaming, and Time Lapse

## ALERTEX

### WIRELESS CRITICAL ALERT SYSTEM

- Wireless with up to 1km transmission between units
- Units repeat to form secure wireless mesh network
- Variety of units for all site requirements
- Monitor and control units via web portal
- NaCTSO and HSG168 compliant
- Approved Installer scheme
- Up to 2-years battery life

**Luminite are specialists in PIR detection, wireless switching, IP connectivity and wireless alert systems.**

We have been designing and manufacturing products from our North London based factory for over 40 years and possess extensive experience in both the commercial security and perimeter markets.

Our extensive range of wireless security solutions are widely used by installers and are noted for their ease of use, robustness and reliability.

At Luminite, we are dedicated to providing our customers with the most dependable and robust security solutions, excellent customer service and knowledgeable technical support.

Detection

# PROTECTION FROM EVERY SIDE

The award-winning OPTEX REDSCAN LiDAR series just went one better, with a new detector featuring its longest range yet. The REDSCAN PRO can accurately detect intruders and moving objects up to 50 x 100m away – making it particularly well suited for the highest security sites. And by creating rectangular, high resolution detection patterns, there are no ‘gaps’, so everything from facades to fences, ceilings to roofs can be covered. For the installer, the sensor’s intelligent multiple zones logic means each detection zone can be independently configured, while its camera module brings visual assistance for configuration and post alarm analysis. Alerts can now be configured to meet specific detection criteria or logic, allowing events to be filtered to enable security teams to focus on what really matters.

**OPTEX are world leaders in high performance Sensing Technologies.**

For more than 40 years OPTEX have led the way in intrusion detection creating a vast range of detection sensors using a variety of different technologies.

Using the OPTEX multi-layered approach you can protect from the perimeter right through to inside the

premises. Ranges for the smallest residential up to the largest commercial property, OPTEX have you covered.

The OPTEX team are here to assist on site survey’s, site drawings and kit lists all the way up to commissioning your security setups.

Detection

# COMMUNICATION, SOUND AND SAFETY SOLUTIONS

TRANSPORT HUBS • VENUES • RESTAURANTS/RETAIL • HOTELS/CONFERENCE CENTRES • HEALTH CARE FACILITIES • EDUCATION INSTITUTIONS

**TOA Corporation is a leading global innovator and manufacturer of cutting-edge commercial audio and security equipment.**

Having first invented the megaphone over 80 years ago we provide voice evacuation, public address and professional acoustic solutions in over 120 countries.

Founded in 1934 in Kobe, Japan, TOA benefits from many years' experience in research, development, engineering services and international sales and

marketing. Our longstanding know-how guarantees quality and the upmost peace of mind when buying and installing TOA products. We pride ourselves that our knowledge in each of our six business fields: Voice Alarm, Intercom, ProSound, Distribution, Wireless and Conference Systems creates acoustic sound fields for millions of people to make lives safer, communication easier and audio entertainment more pleasurable.

**Find out more:** online at [netgenium.co.uk](http://netgenium.co.uk) or by email at [sales@netgenium.co.uk](mailto:sales@netgenium.co.uk)

## Netgenium IP Audio System

The Netgenium IP Audio System is an incredibly scalable and flexible solution that once installed offers a vast range of functionality. Used in locations such as Education, Warehouses, Retail, Transport and Hospitals, the IP PoE Audio solution offers solutions such as:

- Public Address
- Music Streaming
- Lockdown Alert
- Remote Monitoring
- Integration with traditional 100v Line audio systems
- Integration with CCTV systems
- Integration with IP Phone systems

The ASP6202-POE Projector and ASP6203-POE Horn are available now from DVS.

Find out more at [dvs.co.uk](http://dvs.co.uk)

## PoE Powered Analogue Speakers

The PoE Powered Analogue Speaker is such an easy solution to install. Simply connect the speaker to an analogue audio source, like a CCTV camera or NVR, and power from a PoE power source such as an existing switch, midspan, injector or extender.

A user or monitoring station can simply talk to the CCTV camera and any audio is played through the PoE Powered Analogue Speaker.

Some CCTV cameras have a built-in speaker to play live or pre-recorded announcements and adding a Netgenium PoE Powered Analogue Speaker will increase both the volume and quality of the audio.

### Netgenium are a UK manufacturer of a range of IP Power-over-Ethernet (PoE) products and solutions.

Today, our portfolio has gradually expanded to include what is undoubtedly the most comprehensive IP Public Address solution available on the market today.

The recently developed range of PoE Powered Analogue Speakers now offers installers an easy, timesaving and cost-saving solution to add audio to new and existing installations.

Audio

## CSL Router

**Offers instant 4G connectivity for any application.**

Our CSL Router sends data via a 4G SIM, providing an encrypted connection to the internet on sites where wired broadband is unavailable, impractical or slow. Our 4G back-up option upgrades an existing broadband service to a private network, providing a reliable failover business solution if your wired broadband goes down. Single and Managed Multi-Path options are available depending on the installation. For installations that require professional monitoring, CSL Router can be connected to an Alarm Receiving Centre.

Discover more,  
enquire today!

### Immediate Connectivity

Instant internet connection via 4G or back-up an existing wired connection

### For Any Application

Ideal for CCTV, EAS, HVAC, Access Control, Payment Terminals and more

### No Over Usage Charges

Supplied with the appropriate data bundle for usage and tailored to suit each installation

### Enhanced Security

Utilises private APNs and the secure Gemini Global Platform

**Everything about CSL is designed to keep our customers connected, secure and live.**

Simplicity, service and reliability have been at the heart of everything we do since CSL was founded in 1996. The sectors we work in and applications we connect are at the highest end of critical communications. Critical connectivity can be complex but we make it easy.

Our partnerships with all the major Mobile Network Operators, Monitoring Centres and Installers, allows us to deliver complete end-to-end connectivity solutions. Whether it's 4G, IP, xDSL, or FTTC, we have the knowledge, expertise and ability to deliver the best combination for your connectivity requirements.

Connectivity

## Seamless, Cloud-Managed Networking

Whether you're looking for high-performance wired or wireless networking, TP-Link provides end-to-end solutions designed for the most demanding customer environments.

For the last 12 consecutive years, IDC has named TP-Link the world's Number 1 provider of Wi-Fi devices.

Our excellence in research, design and manufacturing dates back to 1996 and has grown to encompass the supply of networking, security and smart home devices to more than 170 countries around the globe.

### What makes TP-Link different?

Aside from product excellence, we believe in customer service. Whether you need advice choosing the correct

configuration or need an engineer's support post-installation, we have people on hand to make sure your installation is a success.

Our award-winning product range delivers power and performance, to maximise budgets and provide the capacity to accommodate tomorrow's technological demands.

veracity

**Veracity UK Ltd designs and manufactures video surveillance systems, security management equipment and software, delivered worldwide through our international subsidiaries and distributors.**

Veracity's products connect, integrate and control a diverse set of security and sensor products and include providing complete video surveillance solutions and security management systems. These systems operate in demanding high-end security and critical national infrastructure sectors alongside our extensive range of market-leading IP transmission solutions and installation tools.

Veracity has developed a wide-ranging portfolio of digital surveillance solutions, including cyber secure devices and software including:-

- Video management software and IP video storage solutions.
- Advanced video display wall software and devices for control rooms and digital signage.

Networking

I simply  
~~search for my~~  
~~keys before I~~  
leave home.

**Introducing the Bold Smart Lock: a simple and affordable solution to keeping your property safe and secure.**

Unlock a keyless life and unlock your door using the free Bold app, Bold Clicker or a PIN code of your choice.

The smart functionality is that the Bold lock can enable/disable the internal rotating part of the lock. This means there is no configuration required, fewer things can go wrong and there is less battery usage.

It's impossible for burglars to enter with common methods as it's made with Duracore materials. The lock is SKG\*\*\* certified, the heaviest possible burglary resistance classification they give.

It also boasts end-to-end encryption, meaning all communication is encrypted in the same way as the latest online banking software would be. As a result, it's not vulnerable to any form of manipulation of communications.

Smart Home

## EZVIZ Pro Range

**Welcome to EZVIZ, a leading Global Smart Home brand for Security and Lifestyle solutions.**

Established in 2013, we dedicate ourselves to bringing peace of mind to our customers with our wide range of product solutions. Whether it is guarding your home, loved ones or pets, we have you protected from the palm of your hands. We are the Smart Home Guardians.

Since its establishment, EZVIZ has been recognized by consumers worldwide and achieved significant technological and sales breakthroughs. Today, with the vision of becoming the most reliable and respected smart home security brand, combined with cutting-edge technology and extensive experience built up over the past few years, EZVIZ is ready to create a safe, convenient and smart life for everyone.

**Welcome to the "World of Rod"!**

We like to think of Super Rod as a big family, involving both our team as well as the hundreds of thousands of customers we have all over the world.

Our approach is to 'Listen, Innovate and Deliver' in everything we do.

We are proud to offer a range of labour saving tools, designed to meet the needs of tradesmen involved with the installation of cable. These tools save time, reduce frustration and increase productivity!

In 2014, Super Rod partnered up with Klein Tools, the world's leading manufacturer of hand tools designed specifically for the professional electrician, further enhancing its offer to European contractors. With 160 years of experience going into every Klein Tools product, installers are guaranteed a hand tool that lasts a lifetime and helps you work safer and more efficiently.

# WTF

(WHERE'S THAT FROM?)

HAYDON

HAYDON

Formed in 1993, Haydon have established themselves as a major supplier of CCTV related products and accessories to security wholesale.
