dvs™

Delivering new technologies in partnership

AI Analytics
Uses powerful algorithms to automate detection, categorisation, and analysis of objects and motion in a camera's view

Low-lighting Imaging
See colorful and clear footage in dim light with Hikvision ColorVu and DarkFighterX technologies

Ultra HD
Solve limited resolution and stuttered video problems with our 4K and smooth streaming technologies

Thermal Imaging
Make the invisible thermal radiation "visible" in the form of heat zone images with thermal imaging technologies

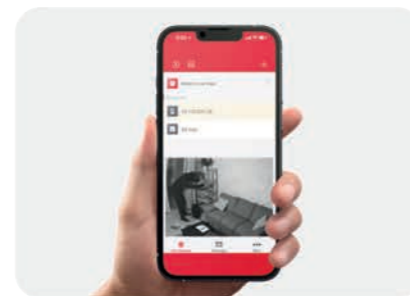

Multi-lens Synergy
Cameras with TandemVu Technology maintain original, big-picture views even during panning, tilting, and zooming manoeuvres

Storage & Bandwidth
Keep your security system up and running smoothly and cost-effectively with H.265+ compression, direct streaming, smooth streaming, and scheduled backup technologies

Intrusion Verification as a Service
Verifying alarms with real-time video when an event happens

Ease of Installation
Save time and money on unnecessary cable installation by using only one cable

CCTV

Celebrating our ongoing partnership with DVS.

At Hikvision we are proud to partner with DVS on their 20th anniversary, who bring to market security products and solutions every day.

Our R&D workforce at Hikvision manufacture a full suite of comprehensive products and solutions for a broad range of vertical markets. In addition to the security industry, Hikvision extends its reach to smart home tech, industrial automation, and automotive electronics industries to achieve its long-term vision. Hikvision products also provide powerful business intelligence for end users, which can enable more efficient operations and greater commercial success.

The outstanding capabilities and performance of Hikvision in the video security industry have been recognised by leading analyst firms and global awards.

PRODUCT PORTFOLIO

Software licence codes

(adjustable: Cloud Storage 1 day – 1 year): no limits on cameras per account / number of users. Easy scalability and connection of old systems & new locations to cloud service

ivideon Bridge

A device to connect any camera brand to Ivideon VSaaS and transform traditional video surveillance system into the cloud

Ivideon business analytics & business intelligence modules

- Face Recognition
- Heat Maps
- ANPR
- People Counter
- Queue Detection
- ivideon Control Center

IVIDEON BRIDGE

Transfer entire business ecosystem, large or small, from on-site storage to the cloud using ivideon Bridge

- Up to 16 cameras per one device
- Compatible with 98% of cameras and NVRs (ONVIF or RTSP protocol needed)
- 10-minute setup, no special skills or knowledge required
- Advanced cloud features without significant capital investments
- Hybrid storage by connecning up to 1TB hard drive and/or up to 128GB microSD card

TOSHIBA

Dedicated Surveillance Drives
Built to deliver, designed to last

- Designed and tested for compatibility
- Industry-leading performance
- Integrated RV sensors
- High endurance, high reliability

Fully supporting the requirements of today's surveillance storage market, Toshiba's expansive surveillance HDD line-up targets the increasing demand of small & medium businesses, professional & public and big data & analytics. Optimised for network video recorders (NVR), digital video recorders (DVR) or centralised backend storage.

Toshiba offers purpose built surveillance storage solutions targeting the different requirements of application areas in today's growing surveillance market. They provide stable 24/7 operation and are optimised for the needs of leading surveillance DVRs and NVRs.

When analyzing security footage, you can't risk any frame drops. That's why your storage has to provide ultimate performance to detect rapid movements, record the smallest details, and perform face recognition. The S300 Pro has been designed to meet your specialist demands and is built for 24/7 reliability and high-performance to help you never miss a thing.

Fire

When it comes to protecting life and property there's no room to compromise. You need a partner that can support you with tried and tested products, global capabilities and local delivery.

Eaton is a leading manufacturer and global supplier of high quality fire systems. With our ability to provide complete systems, not just components, you can be confident in the knowledge that all of our products have been specifically designed and tested to ensure that they are all fully compatible to form a reliable and compliant fire detection and alarm system.

Cutting-Edge Technology: EATON's control panels feature advanced detection algorithms for swift threat identification. Utilizing leading sensor technology, their detectors and smart alarm devices enhance response times.

Seamless Upgrades: Effortlessly upgrade with EATON's two-wire technology, streamlining installations and reducing cabling complexity. Comprehensive guides ensure smooth transitions.

Smart Solutions: Explore cost-effective Fire Alarm Panels, Sounders, and Beacons designed for scalability. Leveraging energy-efficient technology, these solutions ensure sustainability without compromising alert effectiveness.

Surveillance & Security Mounting Solutions

B-Tech mounting solutions cover all Security & AV requirements ranging from CCTV cameras, single surveillance screens, large format displays, projectors, speakers, interactive touchscreens and UC equipment, large, multi-screen video walls and digital signage. Designed by our in-house team of engineers in the UK, B-Tech products are available as wall or ceiling mounts, desktop stands or freestanding, mobile or bolt-down floor stands.

Three of our most popular security ranges can be seen below: **System 2, System V**, and **System X**. Each range is entirely modular, allowing for customisable solutions tailored to your specific requirements. **System V** products are also available as complete kits for added convenience. Audio Visual

HDANYWHERE (HDA) aspires to deliver 80% of everyday smart home functionality for 80% less total cost, by providing unique and innovative products that neaten technology and simplify the user and installation experience.

The HDA product line covers video and audio distribution and control processors that are purpose-built on stable technology platforms and create the "digital plumbing" for a modern AV-centric smart home experience. HDANYWHERE hardware has all the features necessary to help integrators meet a wide range of project requirements.

Choosing HDANYWHERE gives integrators more options to win more projects by delivering better value-for-budget or reducing the cost of entry into smart home living.

DETECTION RANGE 180m indoor / 80m outdoor

OPTIONS custom length approved cabling

POPULAR APPLICATIONS waste & recycling, chemical plants, oil & gas, palm oil refineries, chemical storage, power generation

CORE CONTROL

CORE Control Hub - The central point for the CORE system which provides power, control and interface functions for CORE devices. Supports up to 6 CORE devices directly, and up to 128 with the use of Extension Hubs.

Meets the requirements of BS5839-1 (UK fire standard). Designed specifically for use with fire-rated "FP" data cable and provides over 24 hours backup supply in power failure.

CORE Extension Hubs - Each adds capacity for an additional 4 or 8 CORE devices to the system. Linked to the Control Hub via FP data cable, fibre-optic, or wirelessly.

CORE I/O Module - Allows additonal granularity of alarm reporting to other systems. Provides straightforward linking to fire systems, fixed suppression, water cannons, remote monitoring, and many other systems.

CIQURIX

At Ciqurix we have been designing, developing and manufacturing innovative, revolutionary video fire detection since 2012.

We are a UK company with a global distribution network, enabling fire detection in industries and environments where traditional systems are inadequate.

Our CORE system brings fire detection to areas that were previously unprotectable, providing versatility, reliability and accuracy. Instead of waiting for combustion particles or heat to reach a detector, our video fire detection uses multiple sensors and complex analytic technology to see and recognise a fire starting within seconds. It is designed for compliance to BS5839-1, uses fire-rated cabling, and will continue to operate from its internal battery supply for over 24 hours during power failure.

Detection

OCULi HD ™

- Rapidly deployable to sites with no power
- 5MP camera with adjustable resolution
- 4G secure connection to cloud server
- Self-monitor or integrate with CMS platforms
- 15m or 40m detection patterns
- Battery or solar-powered options
- Two-way audio, Live Streaming, and Time Lapse

ALERTEX
WIRELESS CRITICAL ALERT SYSTEM

- Wireless with up to 1km transmission between units
- Units repeat to form secure wireless mesh network
- Variety of units for all site requirements
- Monitor and control units via web portal
- NaCTSO and HSG168 compliant
- Approved Installer scheme
- Up to 2-years battery life

Luminite

Luminite are specialists in PIR detection, wireless switching, IP connectivity and wireless alert systems.

We have been designing and manufacturing products from our North London based factory for over 40 years and possess extensive experience in both the commercial security and perimeter markets.

Our extensive range of wireless security solutions are widely used by installers and are noted for their ease of use, robustness and reliability.

At Luminite, we are dedicated to providing our customers with the most dependable and robust security solutions, excellent customer service and knowledgeable technical support.

Detection

FlipX
Narrow and wide
detection in one sensor

The OPTEX **FlipX** is a series of Grade 2 and Grade 3 detection sensors suitable for any indoor installations.

The sensors have a innovative lens which can be rotated by flipping the case 180 degrees, to change the detection area from 85 degrees for large spaces or to 5 degrees for narrow spaces in commercial and residential installations.

Thanks to its unique pyroelectric sensor that adapts to the human size and shape, **FlipX** sensors can dramatically cut false alarms.

OPTEX are world leaders in high performance Sensing Technologies.

For more than 40 years OPTEX have led the way in intrusion detection creating a vast range of detection sensors using a variety of different technologies.

Using the OPTEX multi-layered approach you can protect from the perimeter right through to inside the premises. Ranges for the smallest residential up to the largest commercial property, OPTEX have you covered.

The OPTEX team are here to assist on site survey's, site drawings and kit lists all the way up to commissioning your security setups.

Detection

Sound. Simplified.

Ready-to-install Background Music solution.
Offer it to your customers... trust us, **they want this!**

Perfect for:

- Offices
- Salons and spas
- Schools
- Small businesses
- Retail stores
- Restaurants
- Cafés and coffee shops

Trusted Pro Audio Solutions that Harmonize any space.

Elevate your projects with Bose Professional.
As your go-to source for easy-to- install signature audio solutions, you're empowered to create an audio experience that experience that complements the other senses with unparalleled quality and aesthetics.

For those who want simplicity and convenience in pro audio, our system packages are an ideal choice. Inside each ready-to-install package are Bose Professional components that are perfectly matched to deliver our amazing signature sound.

Whether it's your first install or your hundredth, our unwavering commitment to excellence ensures that every project will resonate.

Audio

Netgenium IP Audio System

The Netgenium IP Audio System is an incredibly scalable and flexible solution that once installed offers a vast range of functionality. Used in locations such as Education, Warehouses, Retail, Transport and Hospitals, the IP PoE Audio solution offers solutions such as:

- Public Address
- Music Streaming
- Lockdown Alert
- Remote Monitoring
- Integration with traditional 100v Line audio systems
- Integration with CCTV systems
- Integration with IP Phone systems

The ASP6202-POE Projector and ASP6203-POE Horn are available now from DVS.

Find out more at dvs.co.uk

PoE Powered Analogue Speakers

The PoE Powered Analogue Speaker is such an easy solution to install. Simply connect the speaker to an analogue audio source, like a CCTV camera or NVR, and power from a PoE power source such as an existing switch, midspan, injector or extender.

A user or monitoring station can simply talk to the CCTV camera and any audio is played through the PoE Powered Analogue Speaker.

Some CCTV cameras have a built-in speaker to play live or pre-recorded announcements and adding a Netgenium PoE Powered Analogue Speaker will increase both the volume and quality of the audio.

Netgenium are a UK manufacturer of a range of IP Power-over-Ethernet (PoE) products and solutions.

Today, our portfolio has gradually expanded to include what is undoubtedly the most comprehensive IP Public Address solution available on the market today.

The recently developed range of PoE Powered Analogue Speakers now offers installers an easy, timesaving and cost-saving solution to add audio to new and existing installations.

www.veracityglobal.com

Veracity UK Ltd designs and manufactures video surveillance systems, security management equipment and software, delivered worldwide through our international subsidiaries and distributors.

Veracity's products connect, integrate and control a diverse set of security and sensor products and include providing complete video surveillance solutions and security management systems. These systems operate in demanding high-end security and critical national infrastructure sectors alongside our extensive range of market-leading IP transmission solutions and installation tools.

Veracity has developed a wide-ranging portfolio of digital surveillance solutions, including cyber secure devices and software including:-

• Video management software and IP video storage solutions.

• Advanced video display wall software and devices for control rooms and digital signage.

Networking

4 Components of an Nx Witness System

Cloud
A cloud-based service that enables simple, centralized remote access and insight into any Nx Witness System.
Desktop
A rich media player with a flexible GRID interface designed for connecting to and managing an Nx Witness System.

Server
A powerful, lightweight media server designed to discover, add, and manage system devices and resources.

Mobile
A mobile application for iOS and Android devices designed for remote viewing and control of an Nx Witness System.

The **Metadata SDK** allows developers and tech partners to create installable Plugins for Nx Witness which run on the Nx Server application to create tight, and seamless integrations.

The **Metadata SDK** is focused on bringing object metadata from 3rd party systems - like Face Recognition, Retail Analytics, License Plate Recognition, etc. - to enhance both real-time system intelligence and post-event, post-capture video search and review.

Built For Users
New users can install, configure, and administer systems with little to no training.

Integrate Anything
Suite of FREE Developer tools including: RESTful API and SDK's that anyone can assess and use.

Extremely Dependable
Server Hive Architecture = automatic camera failover and no single point of failure.

Customizable
Individual users can customize their experience with personal layouts and backgrounds.

Supports 99% of Cameras
IP Cameras, USB Webcams, RTSP/HTTP/UDP Streams, and even offline video and image files.

Cross Platform
Windows, Mac, Linux, Virtual Machines, Docker, ARM, iOS and Android browsers.

Fast- Even on Standard Hardware
Speed and responsiveness driven by: good code, adaptive scaling, and Intel Quicksync.

In-Camera Analytics
Use In-Camera Analytics from Axis, Vivotek, and Hikvision IP Cameras to create customer-tailored solutions in the Nx Witness Rules Engine.

Developer Tools
- Video Source SDK
- Storage SDK (C++)
- Server API (Rest API)
- Metadata SDK
- 3rd Party Video Devices
- 3rd Party I/O Devices
- 3rd Party Storage

W Nx Witness

An open, extensible IP Video Management System with Cloud, Desktop, Mobile, and Server applications.

Nx Witness VMS is a lightning fast, easy to use, platform IP video management system (VMS) / video surveillance software designed to discover, view, record, and manage IP video cameras so you can monitor, analyze and react to critical events in real time.

for more information visit:
www.NetworkOptix.com

Nx Witness VMS is a lightning fast, easy to use, cross-platform IP video management system (VMS)
Video surveillance software designed to discover, view, record, and manage IP video cameras so you can monitor, analyse and react to critical events in real time.

Nx Witness is a video surveillance software that is instantly usable, simple to install and maintain, and works exactly the way you expect. (Because you should get the VMS you deserve.)

Nx Witness video surveillance software with Cloud, Desktop, Mobile, and Browser applications that make it easy to connect to and manage your IP cameras from anywhere, anytime.

Nx Witness video surveillance software automatically discovers thousands of IP cameras from hundreds of manufacturers with features like advanced PTZ control, in-camera analytics, universal fisheye dewarping, two-way audio and I/O support in order to support your preferred camera vendor.

SUPER ROD

Welcome to the "World of Rod"!

We like to think of Super Rod as a big family, involving both our team as well as the hundreds of thousands of customers we have all over the world.

Our approach is to 'Listen, Innovate and Deliver' in everything we do.

We are proud to offer a range of labour saving tools, designed to meet the needs of tradesmen involved with the installation of cable. These tools save time, reduce frustration and increase productivity!

In 2014, Super Rod partnered up with Klein Tools, the world's leading manufacturer of hand tools designed specifically for the professional electrician, further enhancing its offer to European contractors. With 160 years of experience going into every Klein Tools product, installers are guaranteed a hand tool that lasts a lifetime and helps you work safer and more efficiently.
