

ESD30

Wireless EasySwitch PIR Detector

- Stylish covert detector design
- Pet immune lens array
- Adjustable pan and tilt feature provides discreet coverage from a variety of angles
- Sliding internal curtains allow for a customisable field of view
- 30m x 20m long range lens
- Powered by 4x AA's or 1x 9-volt PP3 battery (not supplied)
- 3-year battery life
- 500m line of sight wireless transmission range
- Robust IP55 weather rating

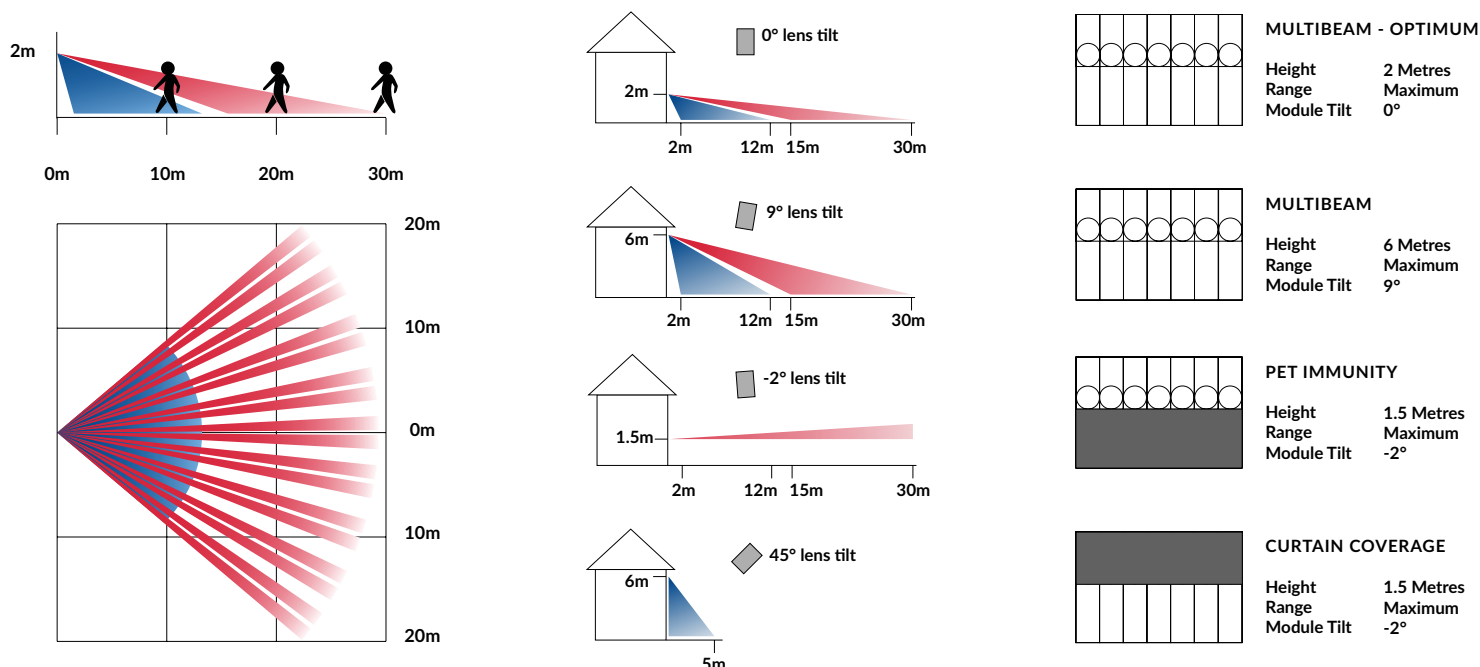

The ESD30 EasySwitch PIR detector joins the extensive range of EasySwitch wireless products to provide a covert PIR detection range of up to 30 metres over a wide area. This battery powered wireless PIR detector can transmit to any EasySwitch receiver over a range of up to 500 metres (line of sight) to form part of a lighting or alarm system.

When used, for example, with an EasySwitch ESR8+8 receiver, the ESD30 can provide highly reliable and accurate motion detection for a home or small business CCTV system. The ESD30 can be paired with more than one receiver so that in addition to providing alarm outputs to a CCTV system, it can also activate internal or external lighting and sound an audible alert via an ESB.1. To control lighting, the ESD30 should be used with either an ESR.1 or an ESR.4 which have switched mains outputs.

The detection area is 30m x 20m and the internal optical assembly can be adjusted from side to side as well as down so that the product does not have to be mounted facing in the direction of the area to be covered. Additionally, this product can be set up for pet immunity or curtain coverage. Walk testing is by way of a bright LED and the unit is IP55 weather resistant.

Lens Pattern & Usage Examples

Technical Specifications

	ESD30 - EasySwitch Wireless PIR Detector
Battery	4 x AA or 1x 9-volt PP3 (not supplied) - up to 3 year battery life
Wireless Transmission	433.92Mhz
Detection Type	Passive Infrared Dual Element Pyro
Detection Range	Adjustable sensitivity up to 30m x 20m - adjustable 180° pan & 90° tilt
Pulse Count	2 - 4
Walk-Test Facility	Day / night momentary red, high-intensity LED
Temperature Range	-10°C to +60°C
Weather Rating	IP55
Enclosure	Durable ABS UV stabilised housing
Weight	300 grams

Dimensions

For Use With

ESR.1
On/Off mains powered receiver

ESR.4
Four way On/Off mains powered receiver

ESR8+8
Receiver with 8 relays.
expandable to 16

ESB.1
UK style plug-in receiver
with bleeper
