# Delivering new technologies in partnership

AI Analytics
Uses powerful algorithms to automate detection, categorisation, and analysis of objects and motion in a camera's view

Low-lighting Imaging
See colorful and clear footage in dim light with Hikvision ColorVu and DarkFighterX technologies

Ultra HD
Solve limited resolution and stuttered video problems with our 4K and smooth streaming technologies

Thermal Imaging
Make the invisible thermal radiation "visible" in the form of heat zone images with thermal imaging technologies
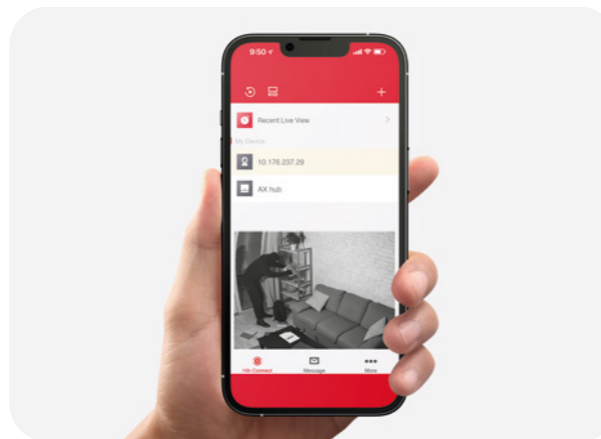

Multi-lens Synergy
Cameras with TandemVu Technology maintain original, big-picture views even during panning, tilting, and zooming manoeuvres

Storage & Bandwidth
Keep your security system up and running smoothly and cost-effectively with H.265+ compression, direct streaming, smooth streaming, and scheduled backup technologies

Intrusion Verification as a Service
Verifying alarms with real-time video when an event happens

Ease of Installation
Save time and money on unnecessary cable installation by using only one cable

Celebrating our ongoing partnership with DVS At Hikvision we are proud to partner with DVS on their 20th anniversary, who bring to market security products and solutions every day.

Our R&D workforce at Hikvision manufacture a full suite of comprehensive products and solutions for a broad range of vertical markets. In addition to the security industry, Hikvision extends its reach to smart home tech, industrial automation, and automotive electronics industries to achieve its long-term vision. Hikvision products also provide powerful business intelligence for end users, which can enable more efficient operations and greater commercial success.

The outstanding capabilities and performance of Hikvision in the video security industry have been recognised by leading analyst firms and global awards.

TOSHIBA

TOSHIBA

Fully supporting the requirements of today's surveillance storage market, Toshiba's expansive surveillance HDD line-up targets the increasing demand of small & medium businesses, professional & public and big data & analytics. Optimised for network video recorders (NVR), digital video recorders (DVR) or centralised backend storage.

Toshiba offers purpose built surveillance storage solutions targeting the different requirements of application areas in today's growing surveillance market. They provide stable 24/7 operation and are optimised for the needs of leading surveillance DVRs and NVRs.

When analyzing security footage, you can't risk any frame drops. That's why your storage has to provide ultimate performance to detect rapid movements, record the smallest details, and perform face recognition. The S300 Pro has been designed to meet your specialist demands and is built for 24/7 reliability and high-performance to help you never miss a thing.

V300

Live View Anywhere You Need it

The V300 introduces Live View mode and motion activated Full HD videos to the VOSKER Cloud. It is the ideal security camera for any area where access to electricity and Wi-Fi network is impossible.

Live Audio-Video Streaming	Solar Powered	SIM Card included	14,000 mAh Battery Pack	Cellular Connectivity	90° Ultra-wide Angle View

2 YEAR WARRANTY

V150

Outstanding Autonomy in Remote Areas

The V150 boasts an incredible battery life. It is equipped with VOSKER built-in solar panel technology & a long lasting 10,000 mAh battery pack. This LTE-based cellular security device is ideal for long-term photo surveillance.

90 ft Motion Detection	Solar Powered	SIM Card included	10,000 mAh Battery Pack	Cellular Connectivity	Night Vision

2 YEAR WARRANTY

VOSKER

Global leader in remote area monitoring

At VOSKER, we're proud to be one of the premier providers of solar-powered and cellular-enabled monitoring tech on the planet. Whether you want to keep a close eye on your lake house or your company wants to secure its sites, we provide the tools to make you see further.

People use VOSKER's tech every day to take millions of photos and videos of remote places in over 50 countries. We're nowhere near finished; we are redefining what's possible...

HDANYWHERE (HDA) aspires to deliver 80% of everyday smart home functionality for 80% less total cost, by providing unique and innovative products that neaten technology and simplify the user and installation experience.

The HDA product line covers video and audio distribution and control processors that are purpose-built on stable technology platforms and create the "digital plumbing" for a modern AV-centric smart home experience. HDANYWHERE hardware has all the features necessary to help integrators meet a wide range of project requirements.

Choosing HDANYWHERE gives integrators more options to win more projects by delivering better value-for-budget or reducing the cost of entry into smart home living.

ENVIRONMENT explosive areas (ATEX)

DETECTION RANGE 180m indoor / 80m outdoor

OPTIONS custom length approved cabling

POPULAR APPLICATIONS waste & recycling, chemical plants, oil & gas, palm oil refineries, chemical storage, power generation

CORE CONTROL

CORE Control Hub - The central point for the CORE system which provides power, control and interface functions for CORE devices. Supports up to 6 CORE devices directly, and up to 128 with the use of Extension Hubs.

Meets the requirements of BS5839-1 (UK fire standard). Designed specifically for use with fire-rated "FP" data cable and provides over 24 hours backup supply in power failure.

CORE Extension Hubs - Each adds capacity for an additional 4 or 8 CORE devices to the system. Linked to the Control Hub via FP data cable, fibre-optic, or wirelessly.

CORE I/O Module - Allows additonal granularity of alarm reporting to other systems. Provides straightforward linking to fire systems, fixed suppression, water cannons, remote monitoring, and many other systems.

CIQURIX

At Ciqurix we have been designing, developing and manufacturing innovative, revolutionary video fire detection since 2012. We are a UK company with a global distribution network, enabling fire detection in industries and environments where traditional systems are inadequate.

Our CORE system brings fire detection to areas that were previously unprotectable, providing versatility, reliability and accuracy. Instead of waiting for combustion particles or heat to reach a detector, our video fire detection uses multiple sensors and complex analytic technology to see and recognise a fire starting within seconds. It is designed for compliance to BS5839-1, uses fire-rated cabling, and will continue to operate from its internal battery supply for over 24 hours during power failure.

OCULi HD

Powerful Self-Monitoring

The OCULi web portal and mobile app allow users to easily self-monitor and control units. An arming schedule can be set for each day of the week which prevents false alarms, excess data consumption and extends battery life. Notifications can be customised for each user, and there is no limit to the number of units assigned to each site. OCULi HD integrates with several popular CMS platforms, such as Webeye, Imimix and Sentinel.

- Rapidly deployable to areas with no power
- HD camera with selectable resolution up to 5MP
- Visual verification over the 4G network in seconds
- Self-monitor or integrate with CMS platforms
- Battery or solar-powered variants
- Two-way audio and live streaming

OCULi HD is a battery-powered, standalone wireless PIR detector with a built-in HD camera. It provides rapid visual verification of captured events over the 4G network. Units and sites can be self-monitored and controlled via the powerful OCULi online web portal and mobile phone app.

Solar Panel — **immix** SureView Systems — **Milestone Systems** — **webeye** — **CMS Monitoring** — **OCULi** — **Web Portal** — **Horn Speaker** — **4G Cellular Network** — **Secure Cloud** — **Mobile App**

Versatile Protection

OCULi HD is fitted with a 5-megapixel camera, and can capture footage in four resolutions: VGA, HD, Full HD and 5MP. When used in conjunction with a solar panel, OCULi HD can livestream events back to the web portal. A horn speaker allows two-way audio between a mobile phone and the OCULi unit, allowing users to challenge whoever has triggered a detection. The horn speaker can also play a sound automatically upon detection.

ALERTEX
## WIRELESS CRITICAL ALERT SYSTEM

- Rapidly deployable with no wires or cabling
- Fully wireless with 1km transmission between units
- Numerous unit varieties for any site requirement
- Monitor and control units via web portal
- Up to 2 years battery life

The ALERTEX Wireless Critical Alert system is a robust wireless alert solution that operates over a secure, wireless mesh protocol, with up to 64 units per site. It is battery operated and requires no wires or cabling. The units are fully portable and rapidly deployable.

Secure Wireless Mesh Network

When Alertex units are assigned to the same site, they form a secure wireless mesh network that causes each unit to act as a repeater; when one unit is triggered, all units on the same site within range will activate. The line-of-sight transmission between units is up to 1km, and the signal can 'hop' up to 16 times across the mesh network. This allows the Alertex system to bounce the transmission signal up to a maximum of 16km line-of-sight and enables it to tackle difficult sites with ease.
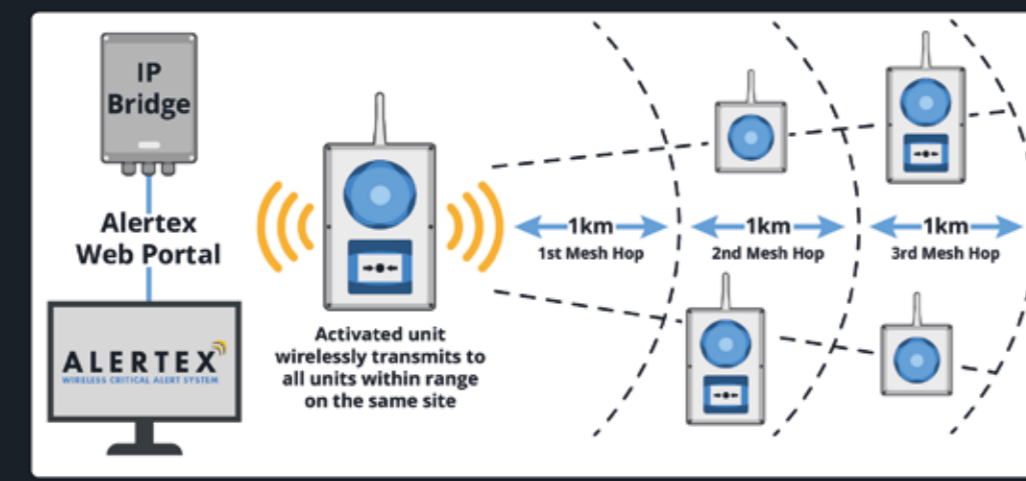

Alertex Web Portal

When used in conjunction with the Genesis IP Bridge, the Alertex system can be monitored and controlled via the Alertex web portal. This adds a secondary level of security and allows maintenance staff to easily check the status of each unit. Tests can be initiated from the portal, and email alerts can be sent to key staff in the event of an activation.

IP Bridge — **Alertex Web Portal** — **ALERTEX** — **Activated unit wirelessly transmits to all units within range on the same site** — 1km 1st Mesh Hop — 1km 2nd Mesh Hop — 1km 3rd Mesh Hop

Approved Installer Scheme

Alertex approved installers are certified by Luminite to install systems to the highest quality. They are listed on our Approved Installers web page and are recommended to customers based on location. Approved installers receive priority access to the latest products and receive discounts on test and demonstration equipment. Contact your local DVS branch for more information on the Alertex Approved Installer Scheme.

ALERTEX APPROVED INSTALLER

Luminite

Luminite are specialists in PIR detection, wireless switching, IP connectivity and wireless alert systems.

We have been designing and manufacturing products from our North London based factory for over 40 years and possess extensive experience in both the commercial security and perimeter markets. Our extensive range of wireless security solutions are widely used by installers and are noted for their ease of use, robustness and reliability.

At Luminite, we are dedicated to providing our customers with the most dependable and robust security solutions, excellent customer service and knowledgeable technical support.

NOW THERE ARE TWO WAYS TO DETECT IN JUST ONE SENSOR

The **OPTEX FlipX** is a new series of Grade 2 and Grade 3 detection sensors suitable for any indoor installation site, from residential, right the way through to logistics and high security locations. Boasting a switchable lens that flips between wide to narrow detection, the sensors feature an innovative pyroelectric sensor that uniquely adapts to the human size and shape dramatically cutting false alarms. Meanwhile, it's flexible mounting height up to 3m and viewable LED indicator ensures easy set up. And thanks to the compact, sleek design, **FlipX** always blends neatly into any space.

OPTEX are world leaders in high performance Sensing Technologies.
For more than 40 years OPTEX have led the way in intrusion detection creating a vast range of detection sensors using a variety of different technologies.

Using the OPTEX multi-layered approach you can protect from the perimeter right through to inside the premises. Ranges for the smallest residential up to the largest commercial property, OPTEX have you covered.

The OPTEX team are here to assist on site survey's, site drawings and kit lists all the way up to commissioning your security setups.

Netgenium IP Audio System

The Netgenium IP Audio System is an incredibly scalable and flexible solution that once installed offers a vast range of functionality. Used in locations such as Education, Warehouses, Retail, Transport and Hospitals, the IP PoE Audio solution offers solutions such as:

- Public Address
- Music Streaming
- Lockdown Alert
- Remote Monitoring
- Integration with traditional 100v Line audio systems
- Integration with CCTV systems
- Integration with IP Phone systems

The ASP6202-POE Projector and ASP6203-POE Horn are available now from DVS.

Find out more at dvs.co.uk

PoE Powered Analogue Speakers

The PoE Powered Analogue Speaker is such an easy solution to install. Simply connect the speaker to an analogue audio source, like a CCTV camera or NVR, and power from a PoE power source such as an existing switch, midspan, injector or extender.

A user or monitoring station can simply talk to the CCTV camera and any audio is played through the PoE Powered Analogue Speaker.

Some CCTV cameras have a built-in speaker to play live or pre-recorded announcements and adding a Netgenium PoE Powered Analogue Speaker will increase both the volume and quality of the audio.

Netgenium are a UK manufacturer of a range of IP Power-over-Ethernet (PoE) products and solutions.

Today, our portfolio has gradually expanded to include what is undoubtedly the most comprehensive IP Public Address solution available on the market today.

The recently developed range of PoE Powered Analogue Speakers now offers installers an easy, timesaving and cost-saving solution to add audio to new and existing installations.

OUR PLANS

Our flexible data packages include everything from dedicated Private VPN static IP SIMS to truly unlimited commercial sims.
All plans include:

- *SIM with static IP Address*
- *No speed caps*
- *Fast 4G & 5G data*
- *Data roaming across the UK & EU*
- *SIM, Micro-SIM or Nano-SIM sizes*
- *Set prices with no hidden costs*
- *Flexible rolling monthly plans*

CSL Router

Offers instant 4G connectivity for any application.

Our CSL Router sends data via a 4G SIM, providing an encrypted connection to the internet on sites where wired broadband is unavailable, impractical or slow. Our 4G back-up option upgrades an existing broadband service to a private network, providing a reliable failover business solution if your wired broadband goes down. Single and Managed Multi-Path options are available depending on the installation. For installations that require professional monitoring, CSL Router can be connected to an Alarm Receiving Centre.

Discover more, enquire today!

4G Immediate Connectivity
Instant internet connection via 4G or back-up an existing wired connection

No Over Usage Charges
Supplied with the appropriate data bundle for usage and tailored to suit each installation

For Any Application
Ideal for CCTV, EAS, HVAC, Access Control, Payment Terminals and more
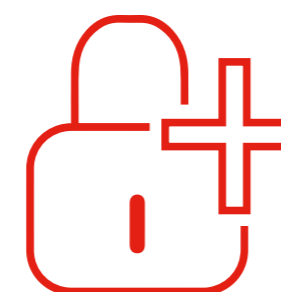

Enhanced Security
Utilises private APNs and the secure Gemini Global Platform

Everything about CSL is designed to keep our customers connected, secure and live. Simplicity, service and reliability have been at the heart of everything we do since CSL was founded in 1996. The sectors we work in and applications we connect are at the highest end of critical communications. Critical connectivity can be complex but we make it easy.

Our partnerships with all the major Mobile Network Operators, Monitoring Centres and Installers, allows us to deliver complete end-to-end connectivity solutions. Whether it's 4G, IP, xDSL, or FTTC, we have the knowledge, expertise and ability to deliver the best combination for your connectivity requirements.

EZVIZ Pro Range

Welcome to EZVIZ, a leading Global Smart Home brand for Security and Lifestyle solutions.

Established in 2013, we dedicate ourselves to bringing peace of mind to our customers with our wide range of product solutions. Whether it is guarding your home, loved ones or pets, we have you protected from the palm of your hands. We are the Smart Home Guardians.

Since its establishment, EZVIZ has been recognized by consumers worldwide and achieved significant technological and sales breakthroughs. Today, with the vision of becoming the most reliable and respected smart home security brand, combined with cutting-edge technology and extensive experience built up over the past few years, EZVIZ is ready to create a safe, convenient and smart life for everyone.

bold
smart lock

I simply search for my keys before I leave home.

bold
smart lock

Introducing the Bold Smart Lock: a simple and affordable solution to keeping your property safe and secure. Unlock a keyless life and unlock your door using the free Bold app, Bold Clicker or a PIN code of your choice.

The smart functionality is that the Bold lock can enable/disable the internal rotating part of the lock. This means there is no configuration required, fewer things can go wrong and there is less battery usage.

It's impossible for burglars to enter with common methods as it's made with Duracore materials. The lock is SKG*** certified, the heaviest possible burglary resistance classification they give.

It also boasts end-to-end encryption, meaning all communication is encrypted in the same way as the latest online banking software would be. As a result, it's not vulnerable to any form of manipulation of communications.

SUPER ROD®

KLEIN TOOLS® EST. 1857

For Professionals... Since 1857™

SUPER ROD

Welcome to the "World of Rod"! We like to think of Super Rod as a big family, involving both our team as well as the hundreds of thousands of customers we have all over the world.

Our approach is to 'Listen, Innovate and Deliver' in everything we do.

We are proud to offer a range of labour saving tools, designed to meet the needs of tradesmen involved with the installation of cable. These tools save time, reduce frustration and increase productivity!

In 2014, Super Rod partnered up with Klein Tools, the world's leading manufacturer of hand tools designed specifically for the professional electrician, further enhancing its offer to European contractors. With 160 years of experience going into every Klein Tools product, installers are guaranteed a hand tool that lasts a lifetime and helps you work safer and more efficiently.
